MISSION | VOICES

Farm Credit System Overview

The Farm Credit System at a Glance

Mission

- The Farm Credit System ('System', 'Farm Credit') was created in 1916 to support rural communities and agriculture with reliable, consistent credit and financial services.

Cooperative Structure

- Farm Credit is a network of cooperatives owned by its borrowers (farmers, ranchers, agricultural cooperatives and rural customers).

Broad Loan Diversification

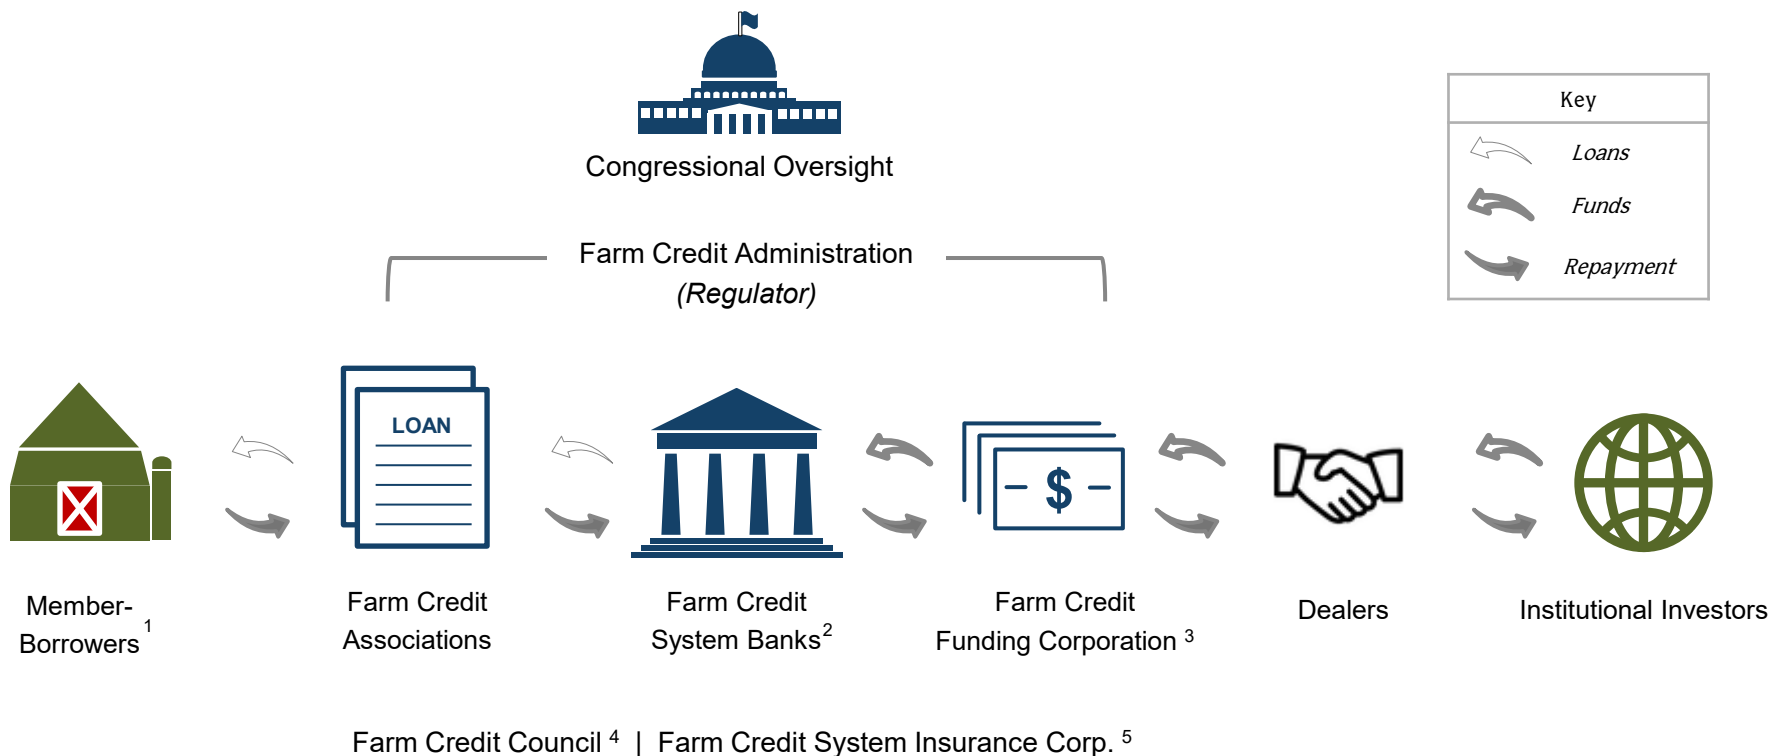

- Farm Credit's loan portfolio is geographically diversified across all 50 states, U.S. territories, and Puerto Rico, supporting approximately **46%**¹ of all U.S. farm business debt.
- The portfolio is also diversified by commodity and loan size.

Regulatory and Congressional Oversight

- Farm Credit is regulated and examined by an independent Federal agency, the Farm Credit Administration (FCA).
- The System is under the Jurisdiction of the House and Senate Agriculture Committees.

Structure and Ownership

1. Farmers, ranchers, rural homeowners, rural utility systems and agribusinesses.

2. AgFirst Farm Credit Bank, AgriBank FCB, Farm Credit Bank of Texas, CoBank ACB. CoBank has lending authority to Associations within its District as well as national lending authorities to agricultural cooperatives, rural utilities and other eligible borrowers.

3. The Farm Credit Funding Corporation is responsible for Systemwide debt issuance and financial disclosure.

4. The Farm Credit Council is the national trade association for the Farm Credit System.

5. The Farm Credit System Insurance Corporation is an independent U.S. Government-controlled corporation which insures the timely payment of principal and interest on debt obligations issued by the Farm Credit Banks.

Net Income

(\$ billions)

Net Interest Margin¹

1. Net Interest Margin is net interest income divided by average earning assets.

Farm Credit System Insurance Corporation

- Created in 1988 through an amendment to the Farm Credit Act.
- Primary responsibility is managing the Farm Credit Insurance Fund.
- Secured a \$10B liquidity line to be used in exigent market circumstances that threaten the Banks' ability to pay maturing obligations.

Insurance Fund

- Primarily to insure the timely payment of principal and interest on Systemwide Debt Securities (provides additional protection for investors).
- Funded by premiums assessed on System Banks, which may be passed on to the Associations.
- Insurance Fund target is 2% of aggregate outstanding insured debt (primarily Systemwide Debt Securities outstanding).
- Insurance Fund invested only in U.S. Government guaranteed securities.
- Assets of \$8.1 billion in the Insurance Fund at March 31, 2025.
- Insurance Fund has never been used for the payment of principal or interest on Systemwide Debt Securities.

Liquidity Management

- The System primarily relies on debt markets for funding.
- In addition, System Banks hold highly-rated investments (limited to less than 35% of the Bank's average loans outstanding for the quarter).
- Approximately 99% of investment securities are rated double-A or higher.¹
- System Banks are required to maintain a three-tiered liquidity reserve, with an overall minimum of 90 days liquidity. .
 - The System Banks' liquidity position was 177 days at March 31, 2025.

System Banks' Available for Sale Investments at Fair Value: \$84bn ²

1. Highest credit rating from at least one rating organization.

2. At March 31, 2025, based on fair value.

3. Mortgage-backed securities comprised of 95% Agency collateralized, 5% Agency whole-loan pass through and <1% Private label-FHA/VA.

Loan Portfolio - Overview

- A variety of loan types are available to qualified borrowers.
- Underwriting standards are based on credit, repayment capacity/cash flow and collateral.
- Loan volume increased 0.9% in the first quarter of 2025 compared to year-end 2024, primarily due to an increase in loans to cooperatives, processing and marketing loans, and power loans, offset in part by a decrease in production and intermediate-term loans.

Gross Loans (\$ billions)

Loan Portfolio - Credit Quality

- Credit quality remains strong with loans classified¹ as Acceptable and Other Assets Especially Mentioned (OAEM) at 97.2% at March 31, 2025, compared to 97.6% at December 31, 2024.
- Credit risk of certain loans is reduced by off-farm income sources and crop insurance.
- 44.8% of nonaccrual loans were current as to principal and interest at March 31, 2025, as compared with 51.9% at December 31, 2024.

Nonperforming Loans² (\$ millions)

1. Farm Credit Administration's Uniform Loan Classification System.

2. Prior to the adoption of CECL on January 1, 2023, nonperforming loans included restructured loans and were presented with accrued interest.

Loan Portfolio - Credit Quality (cont'd)

- The System recognized a provision for credit losses of \$250 million for the quarter ended March 31, 2025, as compared with a provision for credit losses of \$40 million for the quarter ended March 31, 2024.
- Net loan charge-offs of \$43 million were recorded during the first quarter of 2025, as compared with net loan charge-offs of \$88 million for the first quarter of 2024.

Appendix

Tariffs & The Agricultural Sector

- During 2018/2019, U.S. Agricultural export losses due to retaliatory tariffs totaled approximately \$27 billion.¹
 - Exports to China accounted for 95% of those losses.
 - Greatest impact to reduced trade was felt in the soybean market, accounting for 71% of the commodity losses.
- During 2018/2019, the USDA provided approximately \$28 billion in direct support to U.S. Agriculture in the form of Market Facilitation Programs (MFPs) providing payout to producers impacted by the retaliatory tariffs along with traditional farm support.
- Thus far in 2025, the USDA announced that it is issuing \$10 billion directly to producers through Emerging Commodity Assistance Program (ECAP), which should help farms mitigate the impact of increased input costs and declining commodity prices.
- The administration is considering plans to offer additional assistance to farmers amid worries that the trade war could have material impact on American agricultural producers.

U.S. Agricultural Trade Overview

- Approximately 20%¹ of the total volume of U.S. agricultural production is exported.
- The U.S. agricultural trade deficit is expected to widen in 2025. USDA is forecasting \$49 billion less in ag exports than imports.
- Mexico is expected to remain the largest buyer of U.S. agricultural products. Exports to Mexico are forecast to reach a record \$30.2 billion, an increase of \$300 million from earlier projections.

Farm Sector Finances

Net Farm Income

(\$ billions)

- Net Farm Income is forecasted to increase by approximately 30% in 2025, from \$139 billion in 2024 to \$180 billion in 2025. This increase is driven by a significant increase in federal support due to new government aid programs, emergency relief for weather related disasters, and higher commodity prices.

Debt-to-Asset Ratio

- 2025 Debt-to-Asset ratio remains near the long term average. It is expected to decrease slightly from 2023 and expected to remain consistent with 2024.

Working Capital to Gross Revenues Ratio

Commodities Overview

- Global coarse grain production for 2025/26 is forecasted to decrease due to lower production, trade, and ending stocks. Reduced yield prospects from adverse weather conditions have contributed to this decline.
- Grain prices are expected to fall, primarily due to lower global production and reduced trade activity. Decreases in exports and imports have contributed to tighter supply conditions, leading to a reduction in global ending stocks.
